DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 29, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-24 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or render obvious a damper comprising a rod guide assembly having an annular bearing slidably engaging a piston rod, wherein a lubrication channel extends from a fluid chamber around an outside diameter of the bearing to one of a first and second seal; or a damper comprising a rod guide assembly having a guide piston slidably engaging a sleeve disposed between a pressure tube and the guide piston.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lemmons et al. teach a rod guide assembly for a damper, the assembly has a bearing element with a passage intermediate the inner and outer diameter.
